The Settlement Commander,
Office of the Prime Minister (OPM), Pagirinya Refugee Camp.

Date of Submission:

Proposal Reference Number: NGR-2026-001

NextGen Rise Initiative (2026/2027)

The name NextGen Rise symbolizes the empowerment and growth of the next generation. It represents a movement that helps young individuals rise above challenges, unlock their potential, and become future leaders. The name reflects innovation, progress, and a commitment to nurturing skills that prepare youth for success in life, education, and careers.

Theme: *Empowering Youth through Communication, Leadership, and Climate Resilience*

1. Executive Summary

The NextGen Rise Initiative is a community-based youth empowerment program that will be headquartered in the Pagirinya Refugee Camp, Adjumani District, Uganda. Recognizing the dual crises of youth unemployment and environmental degradation, this proposal outlines a comprehensive strategy for the 2026/2027 implementation cycle.

Our mission is to equip 200 underserved youths annually with critical professional skills specifically Competitive Debate, Digital Literacy, and Green Vocational Skills. By fostering a generation of articulate, tech-savvy, and environmentally conscious leaders, NextGen Rise aims to turn local refugee communities into hubs of innovation and climate action, directly contributing to the global fight against global warming.

2. Background and Need Statement

The youth in the Pagirinya Refugee Camp face a convergence of challenges; displacement, limited access to formal employment, and the increasing impact of climate change on their immediate environment.

- 1) **The Skills Gap:** Traditional education often neglects the soft skills of critical thinking and public speaking, which are essential for global leadership.
- 2) **The Climate Crisis:** Refugee settlements often suffer from rapid deforestation and waste mismanagement, exacerbating local temperatures and health risks.
- 3) **The Opportunity:** There is an untapped potential in these young minds to serve as advocates. By bridging the gap between communication skills and environmental science, we can create a sustainable model for community-led recovery.

3. Motto, Vision, Mission and Objectives

Motto: Equipping Youths for a future with possibilities

Vision: To build a resilient generation of global leaders driving sustainable development and climate justice from the heart of underserved communities.

Mission: To provide youth with the intellectual tools (Debate), technical skills (Digital Literacy), and environmental awareness necessary to transform local challenges into global solutions.

Objectives

- i. To institutionalize formal Debate as a tool for conflict resolution, critical thinking, and public policy advocacy.
- ii. To implement high-impact Environmental Stewardship programs, including reforestation and the promotion of clean energy to mitigate global warming.
- iii. To provide certified training in Digital Literacy, ensuring youth can compete in the global virtual economy.
- iv. To mentor and provide seed support for youth-led green micro-enterprises.
- v. To offer mental health support and counseling to youth dealing with the trauma of displacement.

4. Project Base and Infrastructure

Operating out of Pagirinya Refugee Camp (Dzaipi Sub-county), the project will mobilize for and utilize three main pillars of infrastructure:

- i. The Innovation Hub: A physical center equipped with computers for digital learning.
- ii. The Green Zone: A dedicated space for regenerative agriculture training and a tree nursery.
- iii. The Debate Arena: A community space for public tournaments and advocacy training.

5. Executive Committee

The initiative is governed by a dedicated team of professionals ensuring transparency, accountability, and technical excellence:

S/NO	NAME	SEX	POSITION	NATIONALITY
1	EMMANUEL SEBIT JOSEPH	M	CHAIRPERSON/Founder	SOUTH SUDANESE
2	EDWARD EDEMA YEYE	M	VICE CHAIRPERSON	SOUTH SUDANESE
3	EUNICE HARMONY	F	GEN. SECRETARY	UGANDAN
4	NYADRU PATRICK	M	ASS. SECRETARY	UGANDAN
5	UNZIA SHARON	F	TREASURER	SOUTH SUDANESE
6	LAGU RICHARD	M	ASS. TREASURER	SOUTH SUDANESE
7	ANDRUGA HENRY	M	PUBLICITY SECRETARY	SOUTH SUDANESE
8	ANDRUA TEDDY CEASER	F	ORGANISING SECRETARY	
9	IWA DAVID SANTOS	M	PROJECT MANAGER	SOUTH SUDANES

6. Key Activities and Implementation (2026/27)

I. Advanced Debate and Advocacy

Moving beyond simple discussion, we shall implement formal Debate training to cultivate analytical thinking. Youth will learn to construct arguments regarding environmental policy, social justice, and economic reform.

II. Climate Action and Global Warming Mitigation

- a) Reforestation: A youth-led campaign to plant 5,000 indigenous trees across the settlement.
- b) Waste-to-Energy: Training youth to produce eco-friendly briquettes, reducing the reliance on charcoal and preventing further deforestation.
- c) Green Entrepreneurship: Mentorship for startups focused on solar maintenance and sustainable farming.

III. Digital Literacy & Career Coaching

Training in essential software and remote-work skills to allow youth to access the global digital economy without needing to migrate.

7. Implementation Timeline

Phase	Activity	Timeline
Phase 1: Registration and hooking for funds.	Formal entity Registration, Stakeholder and Donor Mapping	March – May, 2026
Phase 2: Mobilization and Awareness	Recruitment of first cohort and staff training	June – August, 2026
Phase 3: Core training	Debate workshop and Green Tech Certification	September – November, 2026
Phase 4: Impact	Innovation challenge and large-scale Tree Planting	December – April, 2026/27
Phase 5: Expansion	Scaling to host communities and other settlements	May - August, 2027
Phase 6: Evaluation	Impact reporting and 2028 strategic planning	September – November, 2027

8. Budget Overview (2026/27)

The total budget for the two-year cycle is estimated at 30,000,000 Shs (\$ 8,400)

Category	Allocation (Shs)	USD	Purpose
Green Infrastructure	10,000,000	2,800	Nursery setup, Solar kits, and reforestation tools.
Tech and Innovation	6,000,000	1,680	Hub maintenance, Internet and Computer Hardware.
Educational Programs	4,500,000	1,260	Debate Tournaments, Facilitators and Certificates.
Seed Grants	5,000,000	1,400	Startup capital for Youth led eco-enterprises.
Admin and Operations	4,5000,000	1,260	Staff stipends, logistics and contingency.
TOTAL	Shs. 30,000,000	\$ 8,400	

9. Expected Outcomes

1. Advocacy: 200 youth trained to debate and lobby for climate-smart policies.
2. Environment: Documented reduction in local charcoal consumption and successful growth of 5,000 trees.
3. Livelihoods: At least 20 new youth-led green micro-enterprises established.
4. Community: A measurable increase in social cohesion between refugees and host communities through shared environmental goals.

10. Monitoring and Evaluation

NextGen Rise will utilize a Continuous Feedback Loop;

- I. Monthly Progress Reports: Tracks tree survival rates and workshop attendance.
- II. Quarterly Debates: Public exhibitions to assess the growth of participants' communication skills.
- III. Annual Impact Audit: A comprehensive review of financial transparency and goal attainment.

11. Call to Action

We invite partners, donors, and stakeholders to join us in this vital mission. Your investment in NextGen Rise is not just a donation; it is a commitment to a greener, more articulate, and economically stable future for the youth of Pagirinya and other refugee hosting communities.
